

## Super Simple 20A Programming Guide

there are three setups.

put throttle stick to max power and turn on the battery

first – **Lipo**            \*peep\* - \*short pause\* - \*peep\*

second – **Ni-XX**        \*peep\*peep\* - \*short pause\* - \*peep\*peep\*

third – **Brake**         \*peep\*peep\*peep\* - \*short pause\* - \*peep\*peep\*peep\*

when you hear the bibs by the second time, just put the throttle stick to idle on the required setup.

repeat the steps to all the configurations.
