**BUILDING AND FLYING INSTRUCTIONS:**

This beautiful and unusual airplane design is well suited for both the experienced modeler and the beginner. It is a free-flight model, but it can be converted to a control line model if desired. The fuselage is made of balsa wood, and the wings are made of 1/16" sheet covering. The landing gear is made of 1/8" plywood and 1/16" sheet covering. The engine is a 1/12" or 1/16" size. The model is easy to build and fly. It is a great model for the beginner and the experienced modeler alike.
